

## **RAISE THE ATTAINMENT OF PRIMARY SCIENCE**

### **Pre-Ofsted Review of Science**

KLA Education is offering schools the opportunity to undertake a pre-Ofsted review of Science to ascertain where they are in the developmental process and what improvements are required as the school moves forward. One of our consultants will visit your school for a day and carry out an in-depth assessment of all aspects of Science and its delivery. This will be a supportive process with the aim of helping the school to understand what further improvements are needed to ensure the whole school is delivering 'outstanding' Science.

The review will consist of:

- A detailed analysis of the school's Science schemes of work to ascertain that they meet the new PoS.
- Look at curriculum time, facilities, equipment and leadership, to advise how improvements can be made.
- Observe two investigative Science lessons and give supportive advice as to how they could be improved.
- Look at recording and reporting and the quality of the pupils' written work.
- Review assessment procedures for both factual and practical Science.
- In depth discussion with the Science coordinator.
- Review how well the pupils are prepared for their move to the next phase of their education.

The school will be asked to supply certain materials before the visit.

**Cost:** The cost of the pre-Ofsted review is **£500**, with verbal feedback on the day or **£600** with a follow-up written report. For further details, or to arrange a review, contact us on **01234 378918** or email **david@KLAEducation.co.uk**
