

RAISE THE ATTAINMENT OF **PRIMARY SCIENCE**

SCIENCE EVENING FOR PARENTS

Keith Atkins is one of the leading Science educationalists in the country. As well as being a Headteacher for twenty years he has also been an Ofsted inspector for Science, Chief Marker for KS2 Science and has designed the Science Studio for Schools of the future. Currently, he delivers in-service Science training for primary teachers.

Keith is now offering to deliver a Science evening for parents to explain the new primary Science curriculum, why it is so important and how it can be delivered to ensure Science is fun and enthuses the pupils. The evening will be engaging for the parents with fun experiments as well as being informative.

The evening is **FREE of charge** to the school. All we ask is that at the end of the session we are allowed to give a very short presentation about the Mobile Primary Science Workstation that turns any classroom into a Science lab.

KLA Education has been developed to raise the attainment of Science as we believe this to be vital for the future prosperity of the country. We therefore hope you will take this opportunity to demonstrate to your parents the commitment you are giving to make Science a key area of your school.
